ELSEVIER

Insurance: Mathematics and Economics 16 (1995) 315

INSURANCE
MATHEMATICS & ECONOMICS

Author index Volume 16

(The issue number is given in parentheses)

Ambagaspitiya, R.S., A family of discrete distributions (2) 107–127

Brockett, P.L., see **MacMinn, R.D.** (1) 63– 68

De Vylder, F. and **E. Marceau**, Explicit analytic ruin probabilities for bounded claims (1) 79–105
Dhaene, J. and **M. Vandebroek**, Recursions for the individual model (1) 31– 38
Doray, L.G. and **A. Luong**, Quadratic distance estimators for the zeta family (3) 255–260

Hesselager, O., Order relations for some distributions (2) 129–134
Hürlimann, W., Predictive stop-loss premiums and Student's *t*-distribution (2) 151–159

Jones, B.L., A stochastic population model for high demand CCRCs (1) 69– 77

Luong, A., see **Doray, L.G.** (3) 255–260

MacMinn, R.D. and **P.L. Brockett**, Corporate spin-offs as a value enhancing technique when faced with legal liability (1) 63– 68
Makov, U.E., Loss robustness via Fisher-weighted squared-error loss function (1) 1– 6
Marceau, E., see **De Vylder, F.** (1) 79–105

Nielsen, J.A. and **K. Sandmann**, Equity-linked life insurance: A model with stochastic interest rates (3) 225–253

Parker, G., A second order stochastic differential equation for the force of interest (3) 211–224
Pellerey, F., On the preservation of some orderings of risks under convolution (1) 23– 30
Pitacco, E., Actuarial models for pricing disability benefits: Towards a unifying approach (1) 39– 62

Sandmann, K., see **Nielsen, J.A.** (3) 225–253
Schmidli, H., Cramér–Lundberg approximations for ruin probabilities of risk processes perturbed by diffusion (2) 135–149
Sundt, B. and **J.L. Teugels**, Ruin estimates under interest force (1) 7– 22

Teugels, J.L., see **Sundt, B.** (1) 7– 22

Vandebroek, M., see **Dhaene, J.** (1) 31– 38

Elsevier Science B.V.
